

## Case Study: Slip - Improving Cyber Security Down Under

**MFA, Email Security, Advanced Anti-Virus, Vulnerability Management, SEIM, Data Backup & Training**

**Caitlin is the legal counsel for Slip—a clothing manufacturing and retail business in Brisbane, Australia.**

ACS was introduced by an Acrisure Agency Partner who currently provides the company's cyber insurance.

Ultimately, Caitlin and her group contracted with ACS for the full security blanket suite of services.

### THE CHALLENGE

Slip was ahead of many in that they already had spent time and energy on their cyber security policies. They however weren't satisfied with their existing solution and sought out ways to improve their cyber protection.

During the discovery process, we were able to help them identify some holes in their defense, especially around email and mobile devices. We are continuing to offer consultative services to help their organization increase their coverage given their improved cyber security policies.

### THE SOLUTION

With Slip's cyber renewal deadline approaching quickly, ACS was able to implement our full suite of Security Blanket services in a timely manner to help ensure Slip was able to remain compliant and secure for their renewal.

Once ACS was fully implemented, Slip was able to work with the Security Operations team to customize their notifications and configurations to fit their needs. They were also able to find comfort in knowing that the ACS Security Operations Center (SOC) was now monitoring their environment 24 x 7 x 365. These services alleviated their limited staff from the burden of security as they were growing too rapidly to keep up on their own.

**Caitlin was impressed by the extensive offerings and capabilities that ACS was able to offer under one roof. Additionally, while ACS was able to greatly improve Slip's security posture, this was also accomplished while saving Slip money when compared to their previous security vendor.**

“We were so pleased to see the thought and attention that went into our solution. It's great knowing that they have our back!”
