

AI RECONTROL

Simplifying IT Management with AireCONTROL IT Service Management Platform

In today's challenging IT environment, teams manage an ever-expanding array of vendors, tools, and technologies. This complexity overwhelms IT departments, forcing IT teams to serve as intermediaries between disparate systems, decipher countless vendor notifications, and navigate a maze of alerts. The result? Operational inefficiencies and increased risk of security failures.

AireSpring transforms this chaos into simplicity. As both your IT management platform and service provider, AireSpring bridges the gap between monitoring and action with **AireCONTROL**—our proprietary, AI-powered SaaS application. **AireCONTROL** consolidates the management of software, devices, connections, and services into a unified, intuitive “single pane of glass” view.

This comprehensive solution integrates networks of all types, including voice, data, and security, while seamlessly connecting with hundreds of carriers through advanced APIs. **AireCONTROL** delivers actionable, enterprise-tailored alerts and provides unmatched visibility into uptime, latency, performance, security, and the overall health of your global technology stack.

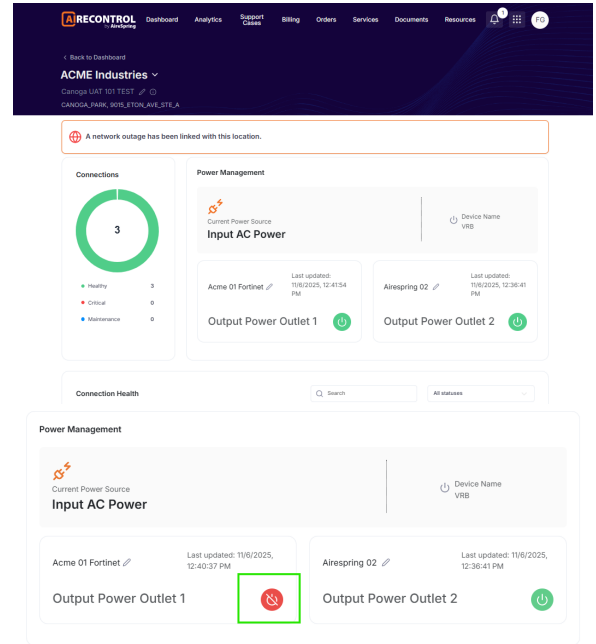

AI Ops: AI for IT Operations

AireSpring's proprietary AI collects millions of real-time data points to correlate and interpret information from:

- The national power grid
- National weather alerting systems
- Carrier network outage events
- Tens-of-thousands of network endpoints
- Syslog and security event data

Key Features and Benefits:

- 1 Real-Time Insights:** Gain instant access to global network data, analytics, and manage invoicing and payments from a centralized dashboard.
- 2 Simplified Management:** With AI-powered automation, manage every aspect of your network lifecycle effortlessly, monitor site health and performance, open and view support cases, and even track order status and project management.
- 3 Vendor Consolidation:** Say goodbye to vendor sprawl as AireSpring and AireCONTROL integrates all your carriers and services under one company and one platform.
- 4 Immediate Support:** Your Tier 3 Engineering POD Support team responds within minutes, ensuring rapid resolution of issues.
- 5 Best Platinum SLAs in the Industry:** 10-minute Tier 3 engineer engagement and response, one-hour change management, next day equipment replacement, automatic case creation, and proactive support.

AireSpring's Remote Power Reboot Solution, integrated directly into AireCONTROL.

Comprehensive Solutions for Every Stage of the Customer Lifecycle

AIRECONTROL

AireSpring's proprietary AI-powered IT service management (ITSM) platform provides 360 degrees of complete visibility and control

AIREDEPLOY

Dedicated team of deployment experts to ensure a successful implementation including a Dedicated Project Manager, Dedicated Tier 3 Managed Services Engineers, and Certified Network & Security Architects

AIRESUPPORT

24/7/365 proactive support and response by AireSpring NOC engineers for initial triage and remote troubleshooting issues and outages, with continuous updates to customer.
