Terremark
Core Site

SERVICES

Internet Primary & Back Up
Point to Point or Multi-Point
Integrated Access
Always on Internet
Hosted Telephony
PRI or SIP Trunks
Business Lines
Virtual Fax

Allied Overview

Allied Telecom is the owner and operator of the Mid-Atlantic region's most comprehensive platform of Internet, Voice and Data connectivity. Since 1990, Allied has garnered a reputation for timely implementations, technical competency, high availability and reliability of its services. By solving the last mile first, Allied brings the network core right to your office suite. Allied is not slowed down by the big phone companies, nor constrained by their limitations. Allied is uniquely positioned to support your critical applications, expansion plans and even same day installations.

Allied as a Delivery Platform

Allied's Optical Transport Network was designed to seamlessly interconnect to data centers, public and private cloud gateways, and other carrier peers. Allied has chosen the industry's best partners and equipment vendors to make quality, high capacity connectivity your reality. This design employs anywhere to anywhere access making Allied the leading choice as a single-source provider of IP-based communications.

Dedicated Internet Access

Travel the globe at speeds ranging from 1 Mbps to 10 Gbps via the Allied multi-layered, highly redundant, Internet Exchange Network.

Metro Ethernet Transport

Take advantage of the lowest latency possible and connect multiple offices and cloud computing data centers via scalable Layer 2 transport.

Voice Services

Relocate your telephony needs to the Allied Hosted PBX cloud or enhance your existing PBX with Allied PRIs and SIP Trunks.

Dynamic Ethernet Access

Fully integrate all Internet, Voice and Data connectivity securely with one investment in a single, high capacity connection.
