Managed EDR

Secure Your Endpoints Against Attack

As many as 77% of advanced threats bypass up-to-date antivirus products. Managed EDR enables us to detect and respond to sophisticated attacks. With its built-in continuous endpoint monitoring and behavioral analysis MSPs deliver comprehensive endpoint defense.

Key Managed EDR Capabilities

Click-To-Respond

Our engineers can take action against advanced threats right from our alert dashboard. We can isolate hosts, terminate processes, delete files and more, without wasting precious time.

Detect Fileless Attacks with Behavioral Analysis

Managed EDR includes patented deep memory analysis to ensure you're informed of even the most elusive threat actors.

MITRE ATT&CK Mapping

Our alerts are mapped to the MITRE ATT&CK framework to provide context and helpful clarity for quick resolution.

Smart Recommendations

Our seasoned SOC analysts have distilled their experience into building automated mitigation recommendations for today's advanced threats.

Scalable Remote Response Actions

Once a threat is detected, it's essential to mitigate it quickly. Our click-to-respond feature supports your team in taking action against cyber-attacks as quickly as possible to reduce potential damage.

Integrated EDR and RMM

Built for MSPs, Managed EDR integrates with our RMM for efficient and seamless endpoint management.
