

Managed SOC

24x7 Cybersecurity

Managed SOC (Security Operations Center) is a managed service that leverages a Threat Monitoring Platform to detect malicious and suspicious activity across endpoints, network, and cloud. Our comprehensive set of features means you can focus on your business while our team of security experts ensures that you have the most advanced protection leveraging your existing tools and technologies.

Key Features

SIEMless Log Monitoring

Monitor, Search, Alert and Report on the 3 Attack Pillars: Network, Cloud and Endpoint Log Data spanning Windows and macOS, Firewalls and Network Devices, Microsoft 365 & Azure without requiring SIEM hardware.

Threat Intelligence & Hunting

Real-time threat intelligence monitoring, connecting to premium intel feed partners giving our customers the largest global repository of threat indicators for our SOC analysts to hunt down attackers.

Breach Detection

Detect adversaries that evade traditional cyber defenses such as Firewalls and AV. Identifies attacker TTPs and aligns with MITRE ATT&CK, producing a forensic timeline of chronological events to deter the intruder before a breach occurs.

Intrusion Monitoring

Real-time monitoring of malicious and suspicious activity, identifying indicators such as connections to terrorist nations, unauthorized TCP/UDP services, backdoor connections to C2 servers, lateral movements and privilege escalation.

Nextgen Malware

Use your own malware prevention or leverage our command and control app for Microsoft Defender backed up with a secondary line of defense using our malicious detection of files, tools, processes and more.

PSA Ticketing

Our SOC analysts investigate each alert, triage the data, and produce a ticket to our PSA system accompanied with the remedy details so you can focus on your operations without hiring additional security engineers.

Solutions to move your business to the cloud, all expertly managed by our team of skilled engineers.
