

Brightspeed Business Fiber

Elevating your Business Performance Through Fiber Connectivity

In our interconnected world, reliable, high-speed connectivity should be a given, but all internet solutions are not created equal. No matter the location, your business deserves high-performance internet that allows you to outpace the competition and delight your business customers and partners.

Fast

Up to 2 Gig Symmetrical (Upload & Download)

Fiber internet is a great choice for high-bandwidth businesses where multiple users want to stream video, back up data, or send and receive large files at the same time. A fiber-connected business delivers an exceptional experience across all devices for your employees.

Reliable

An internet connection you can count on

Brightspeed reliably delivers applications and data using our high-performing network for your business needs. Fiber delivers consistent connectivity for daily business needs with reliable high speeds. Always available, a stable connection you can count on.

Scalable

Options that scale with the needs of your business

Whether you have one employee or 100 employees, you deserve reliable high-speed internet. We offer strategic options that are ideal for everything from light web browsing to bandwidth intensive cloud-based applications and online video collaboration.

We're Brightspeed, a brand-new internet provider on a mission to bring more connectivity to America. We believe where you choose to live and work shouldn't limit your options—and we're building the infrastructure to provide millions of homes and businesses with fast, reliable internet. So, wherever you're streaming, gaming or working, you'll enjoy an uninterrupted experience.

Choose Business Fiber in different speeds and price points that best fit your needs, your business size, and your budget.

Up to
2 Gig

**30+ Connected
Devices**

**Perfect for Next Gen
Business Operations**

- Symmetrical 2 Gbps upload and download speeds
- Ideal for enterprises with more employees doing bandwidth-heavy activities and many devices are connected to the internet
- Many simultaneous video calls, sending and receiving large files via email or cloud environments with regular cloud computing

Up to
1 Gig

**20-30 Connected
Devices**

**Perfect for robust,
multi-tasking
businesses**

- Symmetrical 1 Gbps upload and download speeds
- Ideal for mid-size companies with more employees doing bandwidth-heavy activities and many devices are connected to the internet
- Many simultaneous video calls, sending and receiving large files via email or cloud environments with regular cloud computing

Up to
500 Mbps

**10-20 Connected
Devices**

**Perfect for growing
businesses that need
more bandwidth**

- Symmetrical 500 Mbps upload and download speeds
- Perfect for small-to-medium offices and medial internet usage
- More emails are sent with attachments and employees are on the phone more frequently
- Regular access to cloud applications and simultaneous video calls are common

Up to
200 Mbps

**5-10 Connected
Devices**

**Perfect for the always
connected business**

- Symmetrical 200 Mbps upload and download speeds
- Great for smaller businesses with basic internet needs
- Think simple emails and some voice over IP (VoIP) calls, light cloud application activity, or CRM use
- No more than 5 video calls happening simultaneously
