

Cloud App Security

Cybersecurity Made Easy

Coro's Cloud App Security provides advanced malware detection and robust remediation capabilities to protect users, their cloud drives and apps. By securely connecting cloud applications, Coro ensures monitored, protected, and controlled user access, enabling businesses to safeguard data and apps against a wide variety of threats with ease.

Unified Cybersecurity

Cloud App Security is part of a unified and powerful cybersecurity platform.

- ✓ One dashboard
- ✓ One endpoint agent
- ✓ One AI-driven data engine
- ✓ No integration
- ✓ No headaches

Coro is designed to make your life easier; A single security platform with all the capabilities you need.

Key Supported Security Incidents

-  **Abnormal Admin Activity**
Identifies unexpected actions by admin accounts, including logins from unusual IPs
-  **Malware in Cloud Drive**
Identifies and quarantines malicious files in connected cloud storage
-  **Access Permissions Violation**
Flags logins that breach predefined user access rules based on IP or location
-  **Suspected Identity Compromise**
Flags anomalous user behavior indicating potential account compromise
-  **Mass Data Deletion**
Alerts on the unexpected deletion of large volumes of data
-  **Impossible Traveler**
Detects login attempts from distant locations in unrealistically short intervals, indicating potential credential compromise
-  **Suspected Bot Attacks**
Detects failed login attempts from bots targeting user accounts
-  **Mass Data Download**
Alerts on the unexpected download of large volumes of data

Key Features

-  **Cloud Applications**
Connects, monitors and controls a range of cloud apps: Microsoft Office 365, Google Workspace, Slack, Dropbox, Box, and Salesforce
-  **Dedicated "Quarantine" Folder**
Stores detected malicious files in the "Suspected folder" and creates a ticket for the event
-  **App Connection & Permission Status**
Validates cloud app connections & permissions, with health status displayed as Disconnected, Connected, Incomplete, or Connected (not secure)
-  **Third Party Applications Tab**
Lists and manages third-party apps connected to MS 365 and Google Workspace, offering control and visibility into app usage within the organization
-  **Access Permissions**
Allows admins to set permissions for specific groups, specific users, or all users, with access restricted by country or IP
-  **Impossible Traveler**
Detect login attempts from distant locations in unrealistically short intervals, helping identify potential credential compromise or unauthorized access
-  **Protected Users & Groups Sync**
Provides automatic daily synchronization of protected users and groups with manual triggering by admins
- Threat Detection Policies**
Adds new threat detection policies and actions for admins, including alerts for abnormal admin activity, mass data actions, bot attacks, and identity compromise

Thousands of Customers in **Automotive, Education, Energy, Financial** and more.

Why Coro?

High Threat Detection and Protection Rate

Achieved AAA rating from SE Labs

Easy to Maintain

95% of the workload offloaded from people to machines

Quick Deployment

Simple and quick installation, no hardware required

Fast Learning Curve

Minimal training, simplified onboarding, user-friendly interface

High ROI

No hardware costs, zero maintenance overhead, affordable pricing

High Customer Satisfaction

95% likelihood to recommend - as rated by G2

About Coro

Coro is the easy cybersecurity company. We designed a platform that every lean IT team will master. While other solutions scare people into buying complicated, confusing products, we lead with elegant simplicity. Coro is fast to deploy, easy to use, and designed not to waste your time. Once you install Coro, you'll hardly think about us. That's the point. Coro automatically detects and fixes security problems, so IT teams don't have to spend time investigating or troubleshooting. We're also one of the fastest-growing tech companies in North America, just ask Deloitte.
