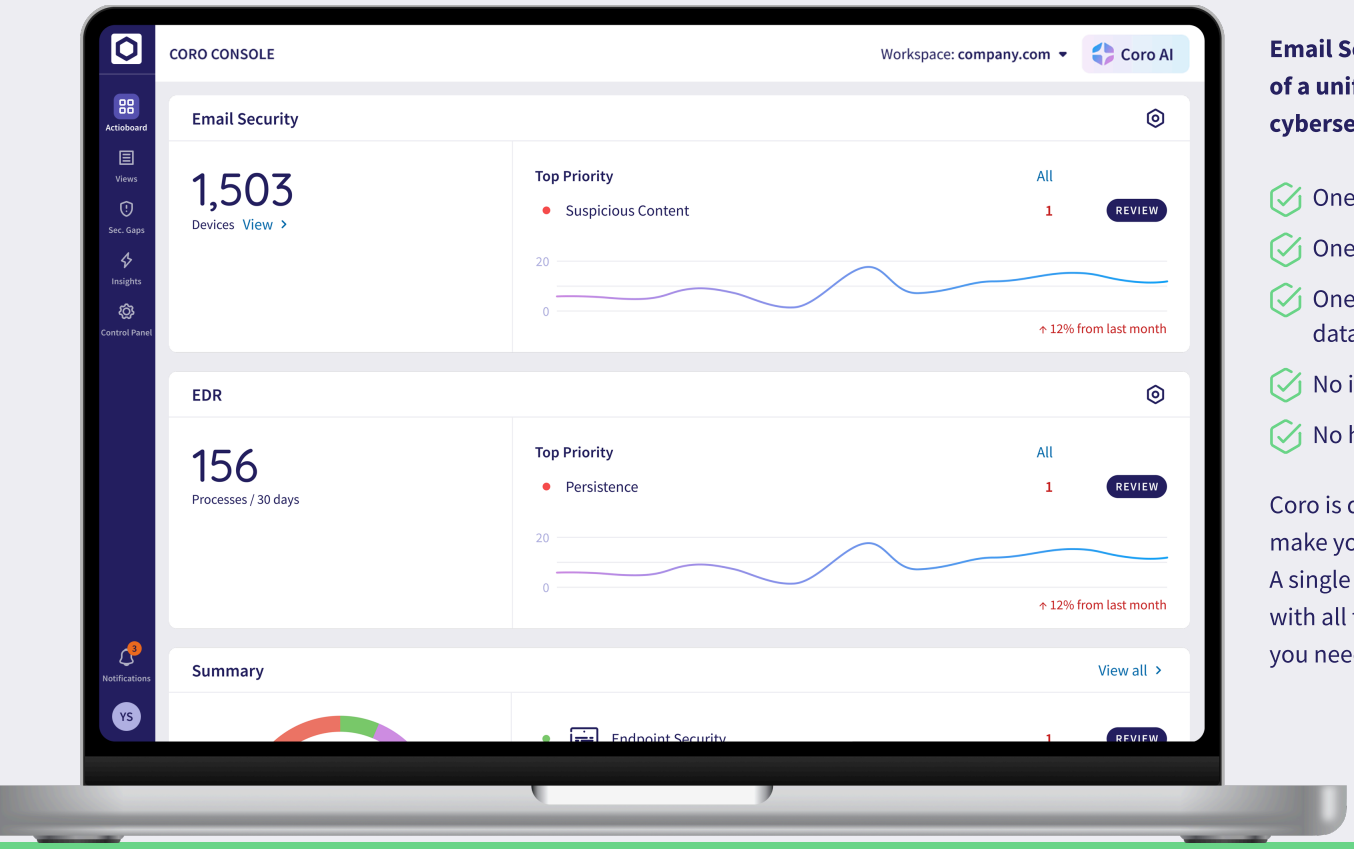
Email Security

Cybersecurity Made Easy

Experience advanced email protection and safeguard your business against data leaks and social engineering attacks with ease. Powered by Coro's intelligent engine and Large Language Models (LLMs), the Email Security automatically monitors, detects, flags, prioritizes, quarantines, and remediates the most advanced threats. Leveraging advanced LLMs increases phishing attack detection accuracy and strengthens the system's capabilities. The module comes pre-configured with baseline security policies built on industry best practices, providing robust protection from day one.

Unified Cybersecurity



Email Security is part of a unified and powerful cybersecurity platform.

- One dashboard
- One endpoint agent
- One AI-driven data engine
- No integration
- No headaches

Coro is designed to make your life easier; A single security platform with all the capabilities you need.

Key Supported Security Incidents

- **Brand/User Impersonation**
  Detects attempts to impersonate trusted brands or individuals
- **Email Phishing**
  Detects phishing attacks that attempt to steal credentials or sensitive data
- **Malware & Ransomware in Email Attachments**
  Detects and removes malicious files embedded in attachments
- **Spam**
  Filters unsolicited bulk emails
- **Domain Impersonation**
  Identifies and stops spoofed domains mimicking legitimate organizations
- **Suspicious Content**
  Scans for risky or deceptive text, attachments, and links
- **Domain Spoofing**
  Flags the email for failed domain authentication
- **Suspicious Metadata**
  Flags emails with abnormal or altered metadata
- **Crowd Blocked**
  Automatically protects emails from senders on the global blocklist
- **Forbidden Attachment Type**
  Blocks unsafe file types, such as executables or scripts
- **Prompt Injection Detection**
  Identifies suspected hidden or obfuscated AI request prompts in the subject or body of emails
- **Missing Required Authentication**
  Identifies emails lacking proper authentication
- **Blocklisted Sender**
  Prevents known malicious senders from reaching users
- **User Reported**
  Enables end-users to report emails as Phishing
- **Mail Exchange (MX)**
  Record Misconfiguration Alerts admins about misconfigured MX record

Key Features

- **API-Based Cloud Email Protection**
  Integrates directly with API-based email providers with no installation or hardware required
- **Quarantine / Warn Modes**
  Isolates suspicious emails or flags them with alerts for review
- **Secure Messages**
  Encrypts sensitive emails and offers a secure platform to access encrypted messages
- **Real-Time URL Protection**
  Rewrites and inspects email links at click time, blocking malicious sites and hidden redirect destinations
- **Dedicated "Quarantine" Folder**
  Stores flagged emails in a separate folder for user review
- **Allow / Block Lists**
  Defines trusted senders or blocks specific domains to control access
- **Inbound Gateway**
  Provides real-time detection and protection for incoming emails from all 3rd party providers at the delivery level
- **Inbound Gateway Setup Monitoring**
  Verifies that inbound gateway is configured correctly and alerts when the configuration is incorrect
- **User Feedback**
  Provides tools for users to report phishing or misclassified emails
- **Phishing Sensitivity**
  Reduces alert volume by configuring phishing sensitivity levels (high, medium or low)
- **End-User Phishing Report**
  Provides users with regular reports of emails that Coro quarantined before reaching their inbox
- **Auto-Forward Protection**
  Policy Deletes unauthorized auto-forward rules to external addresses
- **Multilingual Support**
  Provides additional support for French, Spanish, German and Italian

Why Coro?

High Threat Detection and Protection Rate
Achieved AAA rating from SE Labs

Easy to Maintain
95% of the workload offloaded from people to machines

Quick Deployment
Simple and quick installation, no hardware required

Fast Learning Curve
Minimal training, simplified onboarding, user-friendly interface

High ROI
No hardware costs, zero maintenance overhead, affordable pricing

High Customer Satisfaction
95% likelihood to recommend - as rated by G2

About Coro

Coro is the easy cybersecurity company. We designed a platform that every lean IT team will master. While other solutions scare people into buying complicated, confusing products, we lead with elegant simplicity. Coro is fast to deploy, easy to use, and designed not to waste your time. Once you install Coro, you'll hardly think about us. That's the point. Coro automatically detects and fixes security problems, so IT teams don't have to spend time investigating or troubleshooting. We're also one of the fastest-growing tech companies in North America, just ask Deloitte.
