

DSM Security as a Service

Comprehensive, enterprise-grade protection against cyber threats.

DSM's Security services protect your company's—and your clients'—sensitive data from malware, ransomware, and other cyber threats. We restrict and monitor access to your infrastructure and data, preventing attacks and responding quickly to resolve identified threats. We help ensure the continuity of your business operations.

Why DSM?

- Our best-in-class firewall protects your system at every point.
- Our comprehensive protection includes data leak protection, VPN, wireless LAN security, spam filtering, and more.
- We have three decades of experience protecting sensitive data.
- Our security systems are trusted by even the most secure state agencies.

Customizable solutions for any need

DSM's Security services are scalable, and can meet the needs of businesses and organizations of all sizes, from small and medium to enterprise and government agencies.

Pro-active protection

Our vulnerability assessments identify gaps in your system, enabling development of solutions to protect your critical operations. Additionally, we utilize phishing tests to gauge your employees' awareness of potential scams. We also provide Security Awareness Training to ensure your employees are armed with knowledge regarding phishing scams and other cyber threats.

Complete security

- You benefit from our team of experts without having to invest in FTEs.
- DSM's Security offers 24x7x365 peace of mind.
