

DartPoints' ultra-reliable, high performance cloud couples best-in-class infrastructure with the highest level of care and customer service. Our cloud engineers will work closely with your IT staff every step of the way to ensure that your solution is ideally designed to meet all of your needs, including compliance and security, while also ensuring that your applications are ready for our cloud.

Why DartPoints?

CLOUD SUPPORT

DartPoints' cloud is managed by our world-class support team, with patch management and regular virus scanning on top of our network security protocols. In addition, DartPoints' cloud supports data encryption in-transit and at rest.

TRUSTED SUPPORT

The DartPoints team is available 24/7/365 to support you and your systems. Our trusted cloud engineers are also hands-on during the migration process to ensure that your cloud solution matches your needs.

UPTIME GUARANTEE

Our ultra-reliable, high-performance cloud boasts greater than 99.999% uptime for better performance and productivity.

Services

PUBLIC CLOUD

This multi-tenant solution guarantees reliability and performance. It is never oversubscribed and allows for quick and easy changes to your virtual servers.

- Low latency
- Fully redundant network and storage
- Private VLAN and secure VPN capabilities
- Choice of multiple OSs
- Seamless cloud migration
- On-demand cloud scalability

PRIVATE CLOUD

As a single-tenant solution, DartPoints' private cloud can help you meet your compliance needs while still giving you more flexibility than a traditional infrastructure environment.

- Low latency
- Fully redundant network and storage
- Housed in SOC 2 Type 2 compliant data centers
- Choice of multiple Oss
- Seamless cloud migration
- Single pane-of-glass cloud management system
