

CONTROL . CAPABILITY . CONFIDENCE

100% dedicated, high-performance bare metal servers

When multi-tenant or shared environments cannot cut it, leverage **DartPoints' bare metal** for cloud-like agility with single-user physical equipment in an individualized configuration. Specially designed for edge and specialized workloads, each Dartpoints bare metal server is dedicated to a single tenant—granting full control and exclusive access of a server's resources. When workloads or applications require tactful protection, top performance, and tight predictability, bet on bare metal.

PERFORMANCE

Dedicated computing space brings greater processing power

SECURITY

Physical isolation means authorized access only

CUSTOMIZATION

Full control to build, test, deploy and maintain your own personalized workloads

COST-EFFICIENCY

Server capacity with a steady, predictable, OpEx overhead

BARE METAL IS A MATCH FOR:

-  *Big data analytics*
-  *Hypervisor workloads*
-  *Machine learning*
-  *Containerized workloads*
-  *Kubernetes*
-  *Private clouds*
-  *Edge applications*
-  *High-performance databases*
-  *Multi-cloud environments*
