

Replatform, refactor, and rearchitect your workloads to leverage the AWS Cloud

Successful migration goes beyond a “lift and shift” approach. Partner with us to develop a migration strategy that aligns security policies, elastic cloud resources, containers, and microservices with your business objectives – clearing a pathway for future modernization.

Our Modernization Engineers™ help you accelerate modernization projects across AWS, VMware, and VMware Cloud on AWS for existing cloud environments, data center evacuations, and complex hybrid environments.

Benefits

- ▶ Improve scalability, reliability, and performance
- ▶ Increase operational efficiencies
- ▶ Automate security
- ▶ Optimize costs
- ▶ Access AWS native services and innovation
- ▶ Focus on core competencies and projects that drive business value

Achieve your business objectives with a clear strategy for migration and modernization

Starting with in-depth assessment and planning, we offer guidance and expertise for designing, planning, migrating, and managing your cloud environment, acting as an extension of your internal team.

Our Migration & Modernization services help you:

- ▶ Adopt security best practices
- ▶ Establish proper governance
- ▶ Ensure regulatory compliance (PCI, HIPAA, FedRAMP, FISMA)
- ▶ Incorporate continuous optimization
- ▶ Promote cost efficiency
- ▶ Drive productivity

Effectual, an AWS Premier Consulting Partner, is an innovative, cloud first managed and professional services company that works with commercial enterprises and the public sector to mitigate their risk and enable IT modernization. A deeply experienced and passionate team of problem solvers apply proven methodologies to business challenges across Amazon Web Services and VMware Cloud on AWS.

Cloud expertise and experience leading successful migrations and modernization projects

With over 180 AWS certifications, our Modernization Engineers™ are some of the most qualified in the industry.

Passionate about solving your toughest business challenges, our cloud experts have in-depth experience migrating and refactoring thousands of commercial and public sector cloud workloads with proven business outcomes.

Beyond the implementation of best practice cloud architecture, we employ automation and DevOps tools to deliver high-performing, scalable solutions that propel your success.

Partner with us to assess your workload architecture, develop testable blueprints, and configure security & automation capabilities for accelerating deployments.

Cloud Migration Services

- ▶ Data Center Evacuations
- ▶ Workload Migration
- ▶ Database Migration
- ▶ AWS Infrastructure Procurement
- ▶ VMware on-premise to VMware Cloud on AWS

Modernization Services

- ▶ Cloud Native Application Development
- ▶ SaaS, IOT, AI/ML, and Mobile App Innovation
- ▶ DevOps Process Transformation
- ▶ Data Management
- ▶ Infrastructure as Code
- ▶ Modernize Disaster Recovery & Business Continuity

Data Center Extension Services

- ▶ Footprint Expansion
- ▶ On-Demand Capacity
- ▶ Operationally Similar Test/Dev Environments

A Comprehensive Portfolio of End-to-End Modernization Services

Strategy & Ideation

- ▶ Cloud Readiness Assessments
- ▶ Planning & Proof of Concept
- ▶ Compliance Reviews

Migration & Modernization

- ▶ Cloud Native App Development
- ▶ Migration Services
- ▶ AWS Procurement

Modern Cloud Management

- ▶ Compute & Storage
- ▶ Applications & Databases
- ▶ Data Protection

Optimization

- ▶ Cost Optimization
- ▶ Well Architected Reviews
- ▶ Savings Simplified
