

Equinix global data centers

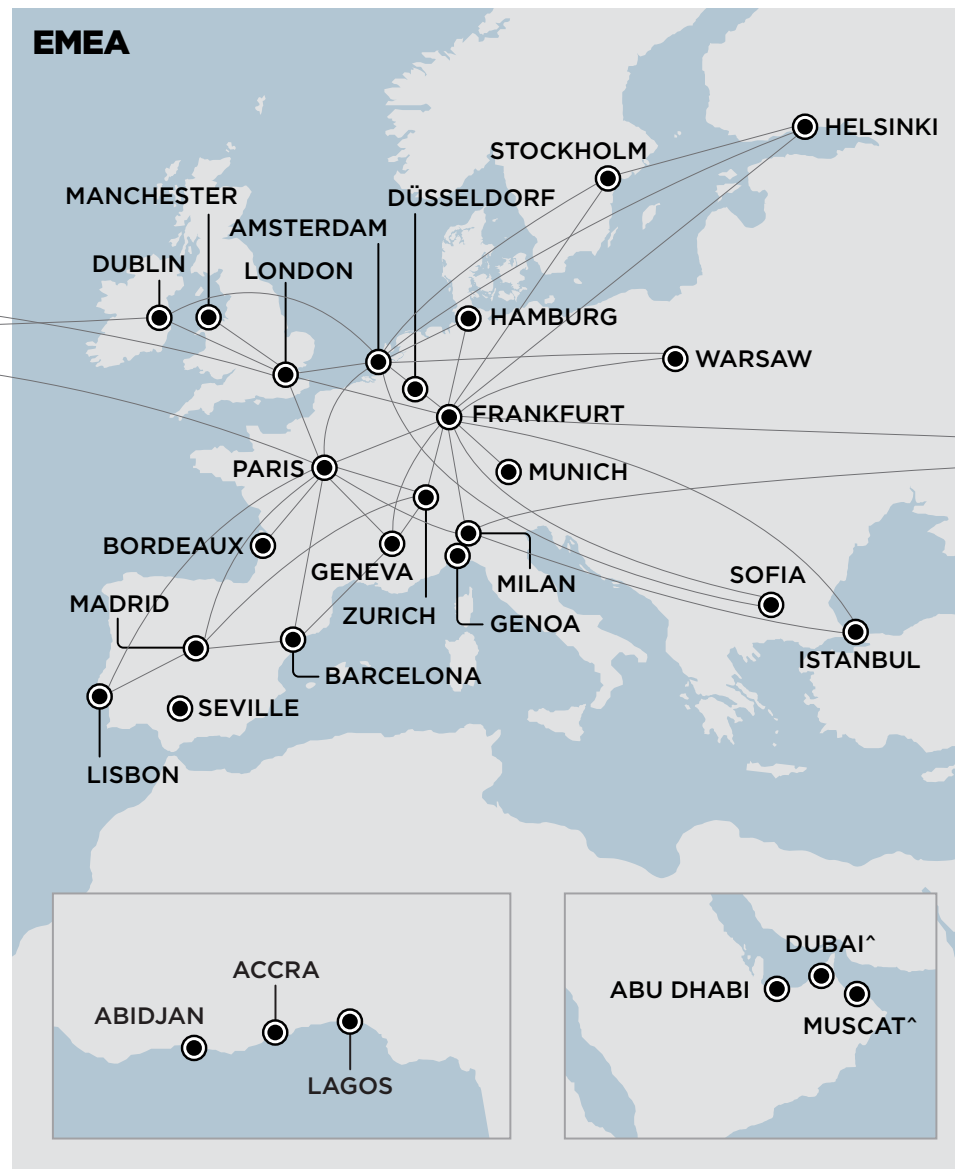

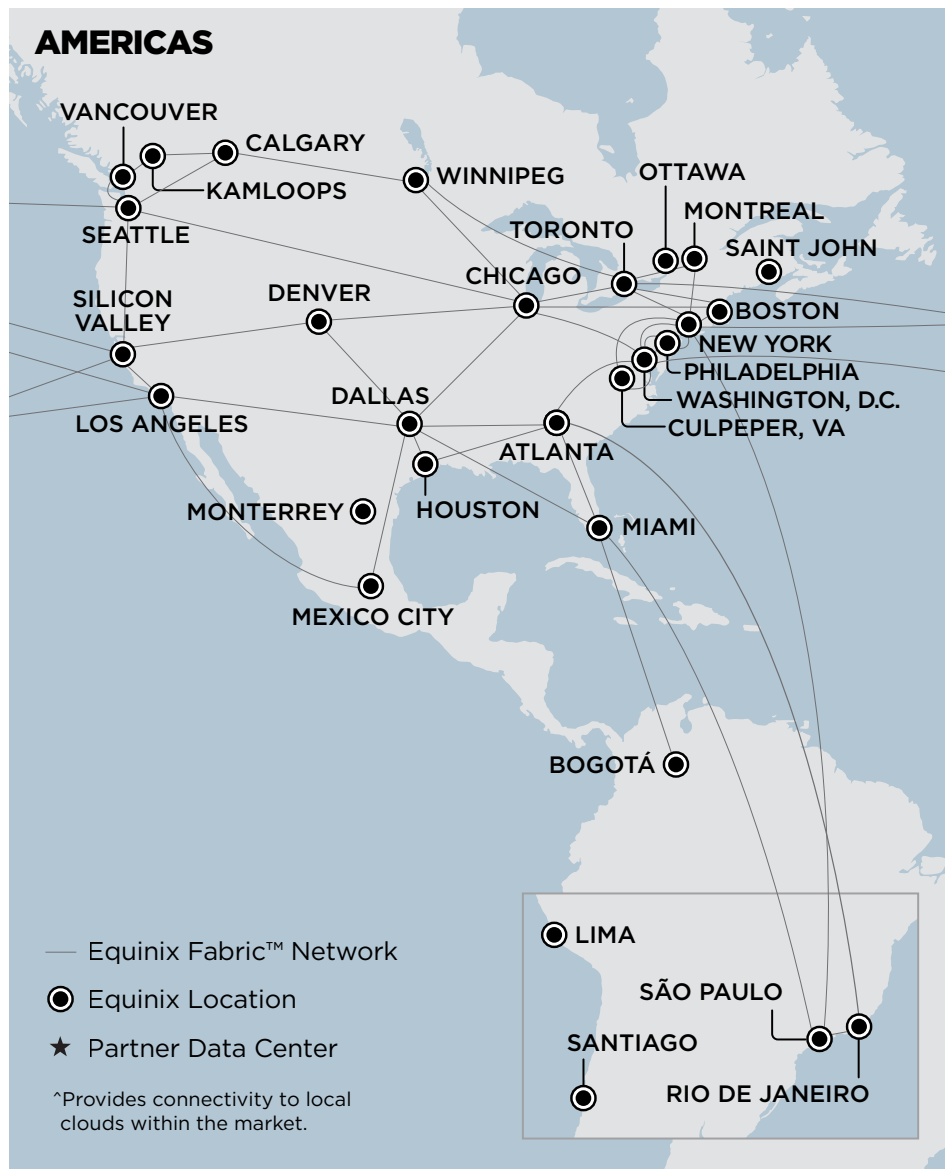

Metro-level metrics

Q2 2022

Equinix is the world's digital infrastructure company™

As businesses expand to create new sources of value and differentiation, we are committed to being wherever opportunity leads. We see a future where digital leaders assemble infrastructure in minutes, anywhere in the world, on demand from an ecosystem of providers.

To help them realize this future across our platform globally, Equinix is opening new interconnected data centers around the world, allowing our customers to bring together and interconnect the infrastructure they need to fast-track their digital advantage.

Global statistics

Platform Equinix® is the world's largest global platform of interconnected data centers and business ecosystems.

240+ Data Centers **71** Metros **435,000+** Interconnections*
>99.9999% Reliability^ **10,000+** Customers*

Includes all countries and metros in which Equinix or an Equinix partner has a physical presence that provides service to customers.

^ As measured from January 1–December 31, 2021, for IBX Operations.

* Total interconnections include both physical cross connections and virtual connections. GPX, MainOne and Entel acquisitions not included in totals for interconnection, but are included in the number of customers.

Unless otherwise noted, all metrics are as of the end of Q2 2022. Data Center, Metro and Country count includes Entel Chile acquisition, which closed August 1, 2022.

Americas

We finalized acquisition of a data center from AMERICATEL in Lima, Peru's largest city. This acquisition follows the four data centers Equinix acquired from leading Chilean telecommunications provider Entel in Chile.

Unless otherwise noted, all metrics are as of the end of Q2 2022. Data Center, Metro and Country count includes Entel Chile acquisition, which closed August 1, 2022.

EMEA

In EMEA, we completed our acquisition of MainOne, a West African data center and connectivity solutions provider. The acquisition brings a full range of transformative technologies and connectivity to the region, including four operational data centers across Nigeria, Ghana and Cote d'Ivoire, as well as land for expansions.

Asia-Pacific

In the APAC region, we opened the first xScale data center in Sydney, following the closing of our joint venture with PGIM Real Estate (the real estate investment and financing arm of PGIM, Prudential Financial's global asset management business). Other recent expansions included the acquisition of two Mumbai data centers and the opening of our fifth data center in Singapore.
