

Comprehensive Managed Security Solutions

Our Managed Security Services provide a holistic approach to security and compliance that spans your network, endpoints, security and event management, monitoring and analysis.

Your 24x7 security team protects people, policies and technology to ensure you're protected and remain compliant across all aspects of your business.

Our holistic managed security approach includes 6 key areas to ensure all your bases are covered:

- Threat Protection
- Identity and Access Management
- Cloud Security
- Network Security
- Endpoint Security
- Compliance Management

Our Managed Security Solution Includes:

- ✓ Automated Threat Detection and Response
- ✓ 24/7 Monitoring and Reporting
- ✓ Security Incident and Event Management (SIEM)
- ✓ Phishing Simulation and Training
- ✓ AI-Driven Root Cause Analysis

Proactive protection that keep your users & data safe

Threat Protection	• Protect against sophisticated attacks • Covers identity, endpoint, apps & data • Secure via a unified platform • Preventive protection, post-breach detection, automated investigation & response
Identity & Access Management	• Single-Sign On (SSO) & Multi-factor authentication (MFA) • Conditional Access • Identity Protection • Identity Governance
Cloud Security	• Identify & re-mediate cloud native attacks • Control how data travels across apps
Network Security	• Collect & analyze information from network devices • Manage endpoint logs • Create alerts to assure your client is covered for regulatory demands
Endpoint Security	• Managed 24/7 • Heuristic threat analysis through AI • Kill and quarantine functionality • Snapshots to rollback to pre-infected state • Full log of all files, processes created & modified by malware
Compliance Management	• Map security controls to industry standards like HIPAA and NIST • Automate compliance reporting and risk assessments • Track data access and activity across users, devices and app
