

POTS Transformation

Copper Retirement Isn't Coming. It's Already Here.

The FCC and carriers are rapidly accelerating the move away from legacy plain old telephone service (POTS) infrastructure. This doesn't just affect voice lines, but also business and safety-critical analog modem communications including fire panels, security systems, elevators, point-of-sale terminals, fax machines, and more.

Why MetTel

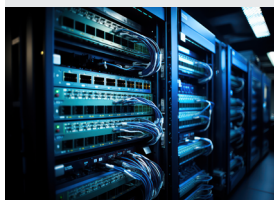

MetTel's POTS Transformation is the nationwide leader in copper replacement for businesses and government agencies. Our turnkey solution is compatible with the broadest range of legacy telecom and safety/security equipment, has built-in network and power redundancy, and saves customers 30% or more on average.

MARKET-LEADING MULTI-WAN HUB

Best-in-class product designed to support business continuity and broad compatibility with legacy systems in a single device.

SMART NETWORK

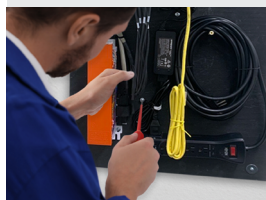

MetTel's private network is geographically dispersed and engineered with multi-layer redundancy for enhanced performance and security.

WAREHOUSE SERVICES

Inventory of preconfigured and pretested boards to support rapid, large-scale deployments.

TURNKEY INSTALLATION

Professional installation and integration services to support legacy systems, with scheduling available through MetTel's convenient app.

MANAGED SERVICES

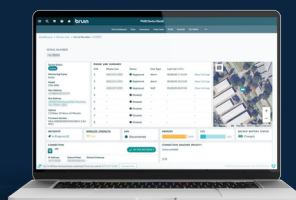

Complete lifecycle managed services with 24/7/365 support and visibility into your environment.

USPS

The USPS to put their trust in MetTel to manage complex copper replacements across 17,000 sites nationwide. The success of this mass deployment earned MetTel the prestigious USPS Supplier Excellence Award.

MetTel Portal

Get a real-time, centralized view of all edge devices with full visibility into device health, connectivity, and call activity. Track network performance trends and receive automated executive reports with actionable insights delivered on your schedule.

Product Features

1 PERFORMANCE & COMPATIBILITY

Supports up to 8 lines and works seamlessly with both legacy and modern communication devices, with flexible multi-WAN connectivity across wired and wireless networks.

2 RELIABILITY & BUSINESS CONTINUITY

Provides dual-SIM LTE/5G cellular failover with multi-carrier access and up to 48 hours of battery backup via an integrated UPS, powering external devices as needed. Ensures continuous operation even during power or network outages.

3 COMPLIANCE, SAFETY, AND SECURITY

UL- and FCC-compliant for life safety and emergency communications, HIPAA compliant for regulated environments, and fully compatible with alarm, elevator, modem, and fax systems.

4 MANAGED SERVICES AND VISIBILITY

End-to-end lifecycle management with 24/7/365 monitoring from a five-time Gartner Leader in Managed Network Services, plus free access to the MetTel Portal for real-time visibility, alerts, and custom reporting across all managed voice and specialty lines.

5 TURNKEY DEPLOYMENT AND SUPPORT

US-based inventory with pre-cabled, preconfigured, and fully tested kits, supported by nationwide professional installation and simple plug-and-play deployment.

About MetTel

MetTel is a global communications solutions provider for businesses and government agencies. We design and deploy tailored connectivity and networking solutions for voice, data, mobility, and IoT by leveraging our global private network and the industry's broadest portfolio of innovative technology.
