Vertically integrated networks

Premium hardware, cloud-based software, and optimized operations for the most complex, demanding networks.

What our customers say

STRAYA

"For a reasonable monthly charge, you get a team of network professionals available 24/7, dedicated to managing your internet infrastructure. That's Meter,"

James Kang
IT Manager

Stord

"Meter is our expert partner in all things networking."

Codi Handley
Director of Security & IT

Webb School OF KNOXVILLE

"I can focus on other things that I need to be worrying about, knowing Meter has my back where internet infrastructure is concerned."

Aaron Teffeteller
Assistant Director of Technology,
Webb School of Knoxville

Future-proof your schools with robust internet infrastructure

Manage a network that works for you

Meter's fully integrated model, network automation, and myriad applications provide a truly stress-free network management experience.

Implement bulk policy updates with a single click

Leverage pre-configurations or tune any configurations you like across speed, VLAN, modes, and more to customize your network to your specific requirements.

Fix your network in record time

Flash LEDs, cycle POE, perform real-time cable tests and more – all from your dashboard.

Leverage an all-in-one security solution

Enforce security policies using our next-gen firewall, including default block via zero trust architecture, DNS security, and modern security protocols.

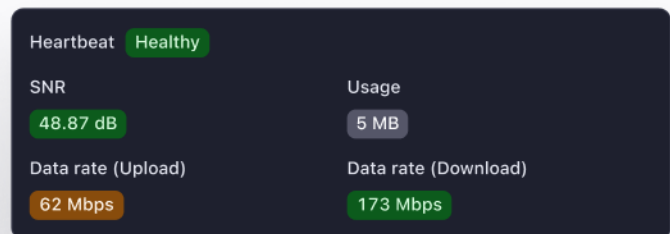

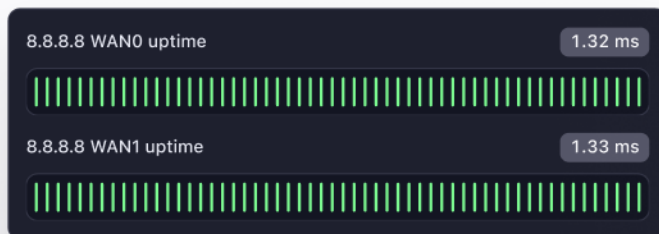

Network reliability

Redundant network designs, MultiWAN capability, and cloud-managed configuration for all devices.

Network installation

Deployments occurring in 3 stages: Discovery, Planning, and Execution, culminating in Ongoing Management.

Network monitoring

Proactive alerting and continuous monitoring for hardware, software, and network management.

Network support

Network troubleshooting and 24/7 operations throughout all of your locations.
