MOMENTUM

CLOUD VOICE

Take business communication and collaboration into the cloud

Unify your workforce with cloud voice

Momentum has been a cloud communications provider for decades — so whatever you're looking for, we know how to deliver it.

Embrace distributed work and remote collaboration with a custom-built cloud service that integrates effortlessly with both Cisco WebEx and Microsoft Teams. Stay connected through our geo-redundant global network, built to comply with regulations like HIPAA. Finally, empower your deployment with a centralized administration portal, advanced analytics, and a full ecosystem of enterprise products.

Whether you need communication, collaboration, or something in between, Momentum's got you covered.

> It just works. We thought we came in with a complex system. Momentum was able to parse out what we do and how we do it. They've been up 24/7, customer support is on top of everything.
>
> **Timothy Jones, IT Manager, Kitsap Credit Union**

HIGHLIGHTS

- High-touch 24/7 support
- Go international with fully-managed Teams Phone
- 200+ global points of presence
- Over 300 applications and integrations, including WebEx and Teams
- Compliant with E911, RAY BAUMs Act, and Kari's Law
- Broad range of solutions from WebEx to Teams

Modern, secure, scalable, and fully integrated

Momentum's Cloud Voice solution is built to deliver flexible voice, video, chat, SMS, and more on any device. Better yet, we have a full ecosystem of products and services, including call recording, reporting, transcription, faxing, and contact center functionality. We've also built multiple products around both Cisco WebEx and Microsoft Teams.

Enhance your calling needs global

Transform Microsoft Teams into a feature-rich business phone system with a carrier-grade network, 200 global points of presence, and unlimited calling within North America. You can also add international calling with our fully managed solution.

Cutting-edge customization

Access over 100 enterprise-grade features to create a phone system tailored to your exact needs, then augment that phone with an extensive product portfolio that includes everything your business needs to stay connected and competitive

WebEx/BroadWorks

Combine Cisco WebEx with an enterprise-grade calling and collaboration platform designed to deliver performance, security, and a feature-rich experience at scale. Combine calling, collaboration, meetings, and more into a single pane of glass management platform for domestic calling.

Seamless administration

Easily manage both users and solutions with a simple, centralized administration portal, complete with advanced analytics features. Scale, add new products, and configure your entire platform with just a few clicks.

Simple, barebones calling

Equip your small business with next-generation cloud calling, collaboration, and communication that won't break your budget. Empower your employees with a unified desktop and mobile experience and integrate fully with Microsoft Teams.

A compliant network

Our network and services are designed with the highest level of security in mind to ensure compliance with regulations like HIPAA. Our Cloud Voice platform also offers full support for e911, RAY BAUMs Act, and Kari's Law.
