

CXone Mpower Recording

Keep a record of every interaction on every channel, and do it in a way that keeps your business and customers secure. With CXone Mpower Recording, complying with GDPR, PCI, and HIPAA standards is a no-brainer. From consent management and masking to encryption and retention—it's got you covered. Make it easy for everyone to do more with your recordings across quality, coaching, and analytics activities. Stop searching for recordings and access, review, and comment on all your interaction transcripts, voice and screen recordings in one place.

Create a trusted world where every interaction is captured, protected, and compliant.

NiCE

Protect your business and build trust

Meet regulatory requirements for PCI, GDPR, and HIPAA while recording up to 100% of interactions.

- Get robust compliance capabilities without the hassle with easy and intuitive configuration for all facets of recording—from recording rules to masking and storage. Relax knowing recordings are secure at all times, with HTTPS/SFTP protection while in transit, and 256 bit AES encryption at rest with pertinent encryption keys managed by AWS Key Management Services. Or use your own key management service—you choose!
- Flexible lifecycle management provides independent control over retention time for call and screen recordings, and the ability to specify time in active storage prior to long term storage. Also leverage the ability to extract recordings for internal use, or ability for customers to provide their own AWS storage managed by their own lifecycle management policies and tools.
- Give your customers peace of mind with ability to prompt them for consent and stop recording based on preference, promoting transparency and consumer trust in your privacy practices.

Manage your recordings without hassle

Manage and locate your recordings instantly with intuitive navigation, effortless search interface, and quick permissions and policy configuration.

- An easy-to-use interactions module, coupled with custom permissions and role-based access control, empowers managers, supervisors, and agents with a single place to access the voice recordings and digital transcripts relevant for their role using filters and free text search.
- Straightforward and uncomplicated policy management and rules-based recording allows you to setup and start recording across channels in minutes.
- Detailed audit trails and dynamic business intelligence reports provide metrics and recording status by channel, team and skill to ensure your recording setup is delivering the desired results, and drill into data to identify gaps for improvement.
- With Recording woven throughout all facets of the CXone Mpower platform, you can seamlessly leverage your recordings for quality management, interaction analytics, reporting, and dashboards—and ensure recording isn't an afterthought.
- Unified recording means no need to install and maintain third-party ACD integrations and no issues syncing data.

Benefits

- Deliver regulatory requirements with ease.
- Ensure security in storage and transport.
- Find interactions in a flash and expedite setup time.
- Empower business users with the intuitive interface and simple permissions.
- Robust functionality to support global expansion.

Recording module

Recording rules setup

See and hear every interactions, anywhere

See and hear agent interactions anytime from anywhere for remote workforce success.

- Real-time screen monitoring lets supervisors remotely see agents' screens during voice and digital interactions in real-time, and listen-in, whisper to coach, and barge in, replacing the over-the-shoulder-coaching you'd normally give in-office.
- Transition to a remote recording model safely and quickly. Easily and reliably record agents to meet compliance needs from anywhere with no additional cost or effort, and say goodbye to messy and cumbersome installations that make remote transitions a nightmare.
- Agent screen recording on multiple computer monitors during all voice and digital interactions—including during wrap-up time—provide insight into process adherence and efficiency gaps, whether agents are in-office or at home.

Record, review, report, repeat

Meet your recording, collaboration, and analytics needs now and into the future.

- Flexible parameters and easy configuration allow you to set granular recording rules ranging from 100% recording, to ANI/direction/employee/skill based recording, all the way to on-demand recording.
- Multilanguage with localization infrastructure future-proofs your investment and helps you achieve a global footprint.
- Collaborate with ease with the ability to annotate, tag, sticky note, and email recording directly from player, or download and export recording files.
- With the ability to append external business data points to CXone Mpower, you can search and create quality management plans with precision.
- Open APIs let you memorialize and access recordings and transcripts from your external CRM or database to keep a complete record of your customer interactions.
