

WHY CHOOSE NETDEPOT?

OUR HISTORY

28 years of client success

Established in 1994, NETdepot is a customer-focused cloud solutions provider that makes IT environments easier to manage. We deliver the best in satisfaction with over 28 years of triumphant customers and cutting-edge technologies.

TRUSTED COMPANY

We're your network and security experts, available **24/7**. Our dedicated, experienced staff has an average tenure of over nine years, with a century of combined experience in the IT industry. NETdepot's mission is to provide a best-in-class customer experience. Let us be a dedicated resource and give your team back much-needed time to focus on business objectives.

CYBERSECURITY

Our revolutionary cybersecurity product, NDSecure, takes the guesswork out of an environment, allowing increased efficiency, ROI, and bottom-line revenue.

- **Automated Penetration Testing**- 12 tests per year, turned around in 3 to 5 days instead of 4 to 6 weeks, utilize comparison charts showing progress over time, all offered at 20% less than other providers charge for one test.
- **Domain Assure**- Automated Domain Monitoring tool searches for look-a-like domains and terminates them.
- **Cyber Insurance**- Shop and find tailored cyber insurance with just a few buttons on our web portal.

DIFFERENTIATED OPERATIONS CENTER

We offer automated, integrated, co-managed or fully managed **SOC & NOC** services for **24/7** monitoring of environments.

AUTOMATION

Robotic Process Automation (RPA) drives our cybersecurity products, including Domain Assure, penetration testing, and NDSecure allowing for better control and improved time-to-detection and time-to-remediation.

INTEGRATION

We take the existing environment, no changes necessary, and bring that into our NDSecure tool, adding value to the overall environment.

- Incorporate existing network and security tools into a single workspace.
- Increase ROI of all existing products.
- Improve efficiency and proficiency to drive productivity within an organization.

No Surprise Fees

Unlike many other companies in the industry which are built on Hyper scalers, NETdepot is built on our own private cloud infrastructure. Allowing us to ensure our pricing is consistent and includes all logs.

Vendor Agnostic

Your existing security and network tools can all be integrated via API or CIS log. No displacement of your current products.

Service, Anywhere

Whether your data is stored on-prem, in the cloud, or in any data center, we can support you. We can service your environment from any location.
