

Fiber Gateway with Integrated 5G Wireless Backup

Features & Benefits

- First device with Fiber 'internet' & 5G 'wireless' network integration
- Uninterrupted service during an internet outage
- Single bill, no incremental mobility charge
- Wi-Fi 6E

Available Speeds

- 1G, 2G & 5G

Rollout Plan

- GA for all regions on 1/13/25
- West – 8/19/24
- SW – 10/14/24

Product Overview

We are proud to introduce the industry's first seamless integration of AT&T's **Fiber and 5G** networks with our groundbreaking CGW452 gateway. This innovation **ensures uninterrupted service** for AT&T Business Fiber customers who order speeds of **1G or higher** with wireless backup-built in. . The new gateway is engineered to provide ultra-fast, high-speed internet and maintain seamless connectivity. In the rare event of an Internet or Fiber network outage, it automatically switches to our ultra-fast 5G network and reverts to fiber when service is restored. This comprehensive solution is provided solely by AT&T, unlike our competitors who need to resell 4G mobility solutions.

Customer Benefits

Uninterrupted Operations: Prevents business disruptions and potential productivity and income loss due to unexpected internet outages.

5G Wireless Connectivity: Leverages cutting-edge 5G technology for faster and more reliable internet connections as compared to LTE.

Automatic Failover and Recovery: Seamlessly switches to the 5G connection in case of primary internet failure.

Cost Efficiency: Investment in mobility backup is cost-effective compared to potential downtime costs.

Single Box Solution: Integrates all necessary components(Internet &5G) into a single device.

Value Differentiators

Fiber + wireless backup
in a **single device**

Access to **5G speeds**
Dependent on service address

Embedded reliability with
automatic failover and
failback

Seamless install by AT&T
field experts

Customer Talking Points

- As your business and bandwidth needs grow, the reliability of your internet connection becomes increasingly critical.
- AT&T knows lost internet connectivity means lost revenue, diminished productivity and frustrated customers..
- AT&T's 5G Wireless network offers superior speeds compared to competitor's multi-device and multi-network 4G/LTE backup solutions.¹
- Embedded Wi-Fi 6E technology, providing faster speeds, lower latencies, and more reliable connections across a broader range of devices.

Resources

- Battery Backup not available
