

Opti9 Cloud Journey

Many Points of Entry. One Journey.

We Have a Plan to Help

While each stage can and does build on the stage before it, the Opti9 Cloud Journey offers points of entry for organizations, no matter where they are. For some, our GamePlan process is needed before we can take even one step forward. For others, a Jumpstart program helps their innovation scale. At Opti9 we have a plan to help. Opti9 Cloud Journey, supported by our Cloud Enablement Program offers four areas of entry to accommodate your business, wherever you are:

1

GAMEPLAN

Your detailed roadmap to get everyone on the same page. Ensuring everyone involved is moving in the right direction together is as crucial as the processes and steps you take on the technology side. We utilize the AWS Migration Assessment Program – a proven three-phased framework (Assess, Mobilize, and Migrate and Modernize) to help you achieve your migration goals. In GamePlan, we start with a Migration Readiness Assessment, and 90% of our customers continue on to the mobilize phase following the assessment.

2

JUMPSTART

A proven series of steps to make your journey to the cloud smooth and successful. In the mobilize phase of the AWS Migration Assessment Program, we help you build a foundation for your migration, identifying and fixing any gaps identified in the assessment phase. Start your journey with years of experience on your side. Gain efficiencies, plan strategy, create sustainable growth and timelines, and much more with Opti9 Jumpstart.

3

MIGRATION FACTORY

A team designed to support your migration to the cloud. While it's certainly possible to move to the cloud on your own, it can be so much easier with experienced and supportive partners. Opti9 holds the AWS Migration Competency and our certified team of experts will walk with you, step-by-step through your cloud journey. Avoid pitfalls and leverage best practices with Opti9 Migration Factory.

4

CLOUD-OPS

An AWS certified team that focuses on your cloud while you focus on your business. Daily cloud operations can be a constant drain on your resources, but with a team of AWS certified experts at the helm, you can be assured that your cloud is in good hands. Our team will monitor, manage, and optimize your AWS environment while your team focuses on business outcomes.

No Matter Where You Are in the Opti9 Cloud Journey, We Have a Custom Solution Built for Your Company to Ensure Your Success.

About Opti9

Opti9 is a hybrid cloud solutions provider with offices in Garden City, NY, Omaha, NE, Overland Park, KS, and St. Louis, MO, and data centers in North America, Europe and the APAC region. The company is an AWS Advanced Consulting Partner and Platinum Veeam® Cloud & Service Provider (VCSP) partner, along with several other key partnerships and certifications. Opti9 specializes in managed cloud services, application development and modernization, backup and disaster recovery, security, and compliance. With its business-first focus, Opti9 blends experience with innovation and new solutions to deliver on its "Right Workload, Right Cloud, Right Time" approach.
