

Pulsar Tracking™ - Reliable Asset and Fleet Tracking Anywhere on Earth

Pulsar Tracking™ Solar Solution

Pulsar Tracking Solar Solution delivers real-time, dependable visibility of your critical assets, transportation fleets, and equipment - no matter where they operate. Powered by Iridium Edge Solar and paired Pulsar Tracking™, customers receive global satellite coverage with a secure, user-friendly tracking portal, ensuring your operations stay connected and informed in even the most remote locations. Whether monitoring vehicle fleets, heavy equipment, or shipping containers, Pulsar Tracking keeps you in control with detailed position reporting, alerting, and historical movement data - accessible from any web browser, iOS, and Android device.

Why Pulsar Tracking™ Solar Solution

- **Truly Global Coverage:** Iridium's global satellite network keeps you connected reliably, everywhere, including polar regions, when it matters most.
- **Solar-Powered Reliability:** Maintenance-free, solar-powered hardware eliminates the need for battery swaps or external power.
- **Low-Cost Deployment:** Quick to install and scalable for fleets of any size.
- **Detailed Movement History:** Track historical routes, stops, and usage for complete operational insight.
- **Custom Alerts & Reporting:** Geofencing, tamper alerts, and scheduled position updates keep you informed.
- **One Platform, Total Visibility:** Consolidate all assets, fleets, and vehicles into one secure single pane of glass portal for total visibility and management.

How It Works

- Iridium Edge Solar hardware securely attaches to asset, vessel, vehicles, containers, or heavy equipment.
- Position data transmits via Iridium's satellite constellation to global ground stations.
- Data is delivered to Pulsar's secure servers and displayed in real time in the Pulsar Tracking Portal.
- Users access asset locations, routes, and alerts from Pulsar Tracking™ on any computer, tablet, or mobile device.

Iridium Edge Solar

Solar-Powered, Maintenance-Free: 10+ years of autonomous operation.

Rugged & Weatherproof: Designed for extreme environmental conditions.

Flexible Mounting: Ideal for vehicles, equipment, or remote containers.

Programmable Position Reporting: Up to 4+ reports per day, configurable for your operational needs.

Pulsar Tracking Cloud Management Portal

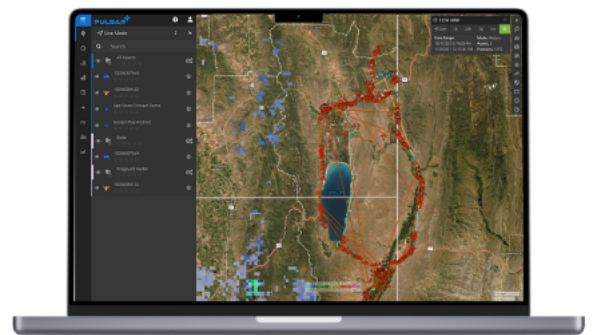

Intuitive Dashboard: Monitor thousands of assets from a single pane of glass..

Customizable Alerts: Receive instant notifications for movement, unauthorized use, or boundary breaches.

Geofencing: Define zones for automated entry/exit alerts.

Historical Playback: Review past routes and performance for compliance and operational insight.

Multi-User Access: Role-based permissions for teams, partners, or customers.

Applications & Industries

Transportation & Logistics: Monitor fleets, trailers, and high-value cargo. Prevent theft and track utilization of

Agriculture, Forestry, & Heavy Equipment: Monitor remote farming equipment or vehicles in rugged terrain.

Energy & Mining: Track critical assets in off-grid and harsh environments.

Maritime & Ports: Monitor containers, workboats, and harbor equipment.
