

RingCentral Rooms™

Transform your meeting spaces into dynamically enabled video conferencing destinations.

RingCentral Rooms is a video conference room system that is easy to set up, manage, and use, with flexible configurations to meet your needs. It runs on RingCentral's industry-leading video platform, enhancing workplace collaboration for hybrid workforces, with employees attending meetings both in person and virtually.

Benefits

Makes any room a video conference room

Modernize any size room for video and seamlessly connect offices, employees, partners, and customers.

Intuitive and easy to use

Make your meetings seamless. From the controller, join a meeting with one touch, send an invitation to participants, and control the camera, speakers, and video. And quickly schedule meetings and avoid conflicts with integrations with your Microsoft and Google calendars.

Easy to deploy, monitor, and manage

Simplify your IT management, minimize setup costs, and speed ROI with integrated appliances from leading hardware vendors.

In-meeting screen

Offers flexible configurations

Use existing room systems or off-the-shelf components for your preferred operating system and get certified peripherals including cameras, microphones, and speakers.

Reliable and safe

Data encryption keeps your information safe, with our multi-layered security approach backed by HITRUST, HIPAA, and GDPR certification. RingCentral Rooms runs on RingCentral's video meeting platform, which means you get reliable call quality with a 99.999% SLA and HD audio and video.

RingCentral Rooms brings video to any size room

- Conference rooms
- Huddle rooms
- Executive offices
- Training rooms

Hardware

Integrated room appliances

RingCentral has all-in-one Android appliances with tablet controllers with standard providers such as Poly, Logitech, and Yealink, with RingCentral pre-installed.

Benefits:

- Easy to set up and manage.
- Simple to use with RingCentral pre-installed.
- Scalable for rooms of all sizes (small, medium, large).
- Participant tracking, auto-framing, and background noise cancellation come as a part of the appliances and allow users to focus on the meeting.

Bundled and certified room kits

Get room kits from vendors with certified Mac and Windows bundles that contain all the components and cables.

Supported operating systems

- Android
- iOS
- Mac
- Windows

Key features

One-touch meeting initiation

Initiate, join, and manage meetings with one touch. Minimize time trying to make room equipment work.

Calendar integrations

Integrate a room's meeting schedule with both the Microsoft and Google calendaring systems to enable participants to quickly join a scheduled in-room meeting and eliminate scheduling conflicts.

Wireless screen sharing and projection

Share screen content during video meetings wirelessly and project from your laptop to the in-room display without fumbling for cables, dongles, or remotes.

Off-the-shelf room kits

Customize your setup with off-the-shelf components. Purchase any computers, tablets, speakers, mics, or cameras separately.

Certified peripherals (cameras, microphones, speakers)

- AVer
- Jabra
- Logitech
- Nureva
- Poly
- Yealink

Alerts to monitor room health and device status

Allow IT admins to automate Rooms monitoring and set alert frequencies for email or team messages. With these alerts, your organization can access the insights they need to measure ROI, identify and solve problems, and make informed decisions.

App screen dims when inactive

The app screen will dim after five minutes of inactivity, which will prevent screen burn-in on displays.

Cross-platform support

RingCentral Rooms is supported on both iPad and Android tablet controllers.

Control the room

As a host, you're always in control. Assign moderators, mute participants, set up waiting rooms, and manage who can invite guests and share their screens.

Invite participants during a meeting

Search and invite contacts from the Rooms controller.

Mobile to room switch

Seamlessly switch devices during a meeting while on the go from a mobile device to a nearby meeting room.

Dual screen support

See shared content on one screen and video meeting participants on another so you can engage and interact with participants.

Mobile phone as a controller

Enable a touchless experience in meeting rooms by controlling the room with your personal mobile device.

Voice-activated control

Enable a touchless experience in meeting rooms by starting scheduled meetings with a “Hi, RingCentral, join meeting” voice command.

Consistent and unified experience

Built on the RingCentral platform, users enjoy a simple, interactive experience that is seamless across RingCentral’s video and team messaging.

Monitor and manage rooms at scale

The admin dashboard provides real-time and historical Rooms software updates and manages reports of room usage, meetings, and devices.

Layout control for multiple displays

The configurable display can be switched among content, active speaker, and gallery view.

Use the meeting room hardware as a softphone*

Use the existing RingCentral Rooms hardware setup to place phone calls.

Invite participants during a meeting

Voice-activated control

Mobile phone as a controller

Layout control for multiple displays

*Requires eligible RingCentral plan with Phone included (MVP Standard, Premium, or Ultimate).

Graceful recovery from network disconnections

When network connectivity issues interrupt your meeting, we'll automatically pair the host and controller once your system is back online.

Camera auto-framing and pan-tilt-zoom controls

Turn on auto-framing and PTZ controls to present the best view of the participants in the meeting room.

Participate in breakout rooms

A room can participate and be assigned to a breakout room by a meeting host.

Proximity sharing

Use the RingCentral desktop app to directly share content to a nearby room via Bluetooth without joining the meeting.

Mute/unmute the room microphone.

Invite others to the meeting.

View and manage participants.

Record meeting.

Turn the room's video camera on and off.

The image shows the RingCentral Rooms control interface. At the top, it displays 'Meeting ID: 555-111-222' and a timer '00:29'. Below this are three large circular buttons: 'Mute mic' (with a microphone icon and a red slash), 'Turn off camera' (with a camera icon and a red slash), and 'Share screen' (with a screen icon and an upward arrow). Underneath these are five smaller buttons: 'Invite' (with a person icon), 'Participants' (with a group of people icon), 'Resume recording' (with a circular arrow icon and '00:29' below it), 'Change view' (with a screen icon), and 'Settings' (with a gear icon). At the bottom center is a large red button with a white phone handset icon. To the right of this button is a speaker icon and a volume slider.

Share content from your laptop or mobile device.

Access Rooms admin settings.

Change display layout.

Change the room's speaker volume.

End meeting.

How to buy

RingCentral Rooms is available as an add-on license with the purchase of a paid plan (RingCentral Video Pro+ or RingCentral MVP™ Standard, Premium, or Ultimate edition) and complements the existing RingCentral video experience in meeting rooms. RingCentral Rooms appliances and Rooms-in-a-Box

kits, with on-site and remote installation services, are available with our [Professional Services](#) team and can be purchased separately or together with a RingCentral Rooms license. Contact a RingCentral account representative to learn more or visit ringcentral.com/office/rooms.

For more information, please contact a sales representative. Visit ringcentral.com or call 855-774-2510.

RingCentral, Inc. (NYSE: RNG) is a leading provider of business cloud communications and contact center solutions based on its powerful Message Video Phone™ (MVP™) global platform. More flexible and cost effective than legacy on-premises PBX and video conferencing systems that it replaces, RingCentral empowers modern mobile and distributed workforces to communicate, collaborate, and connect via any mode, any device, and any location. RingCentral offers three key products in its portfolio including RingCentral MVP™, a unified communications as a service (UCaaS) platform including team messaging, video meetings, and a cloud phone system; RingCentral Video®, the company's video meetings solution with team messaging that enables Smart Video Meetings™; and RingCentral cloud Contact Center solutions. RingCentral's open platform integrates with leading third-party business applications and enables customers to easily customize business workflows. RingCentral is headquartered in Belmont, California, and has offices around the world.
