SilverSky Overview

Enterprise-grade cybersecurity delivered on demand equals peace of mind

Organizations face common barriers to cybersecurity effectiveness regardless of their size or industry. We level the playing field with access to powerful cybersecurity.

Digital transformation, remote work, distributed office locations, and an ever-changing global regulatory landscape are testing the bounds of traditional security and introducing new risks. As cybersecurity complexity and costs accelerate, effective solutions can seem out of reach and hard to integrate.

Modern organizations like yours need protection delivered in a way that is simple, accessible, and fits your budget. In today's cybersecurity challenges, partnering with a firm like SilverSky makes sense.

SilverSky offers one of the most comprehensive sets of cybersecurity services in the industry. Delivered as a managed services model with on-demand access, our services are backed by enterprise-grade, integrated technology and the skilled expertise to run them. Our security operations centers monitor your on-premise, cloud, or hybrid environment for threats 24x7x365, with real-time remediation capabilities.

SilverSky takes care of defending your organization – while you take care of business.

Five Services That Strengthen Your Security Posture

SilverSky has the most comprehensive set of enterprise-grade cybersecurity services in the industry. From detection to response and remediation, we deliver the cybersecurity coverage you need – when you need it.

1	**Managed Detection & Response** Monitors, investigates, and disrupts advanced threats in real-time inside the perimeter – across DNS, AD, email servers, security devices, and endpoints.
2	**Security Device Management** Extends threat protection beyond traditional perimeters to address security challenges along the modern network edge, including cloud and mobile networks.
3	**Managed Endpoint Detection & Response** Delivers visibility into your growing endpoint environment, with detection and remediation supported by machine learning.
4	**Email Protection Services** Guards the #1 attack vector against phishing, malware, and ransomware attacks that threaten infiltration and compromise.
5	**Vulnerability Management** Identifies and prioritizes vulnerabilities using a risk-based approach, guides remediation, and performs validation scans to confirm success.
