

Nextgen AM Service **to protect Identity and Digital Assets**

Enterprises today must solve challenges that come with digital advancement and change in work culture which directly impact their brand equity and trust. One of the core IAM program goals is to ensure the security of identities, data and services. Identifying the right technologies, controls and people to execute a robust AM strategy can be overwhelming, expensive, and a long-haul journey.

Simeio offers comprehensive Managed AM services to tackle core enterprise challenges associated with planning and implementing efficient access policies & controls. Enterprises now have access to a holistic package to suit specific requirements and priorities, backed with a team of IAM experts with decades of experience and expertise.

SOLVE KEY ENTERPRISE CHALLENGES WITH MANAGED AM

» Need for efficient & Dynamic Access Controls	» Adoption of SaaS/Cloud without compromising enterprise security	» Complex and ever emerging threats
» Balancing security enforcement with user-experience	» Complexity of distributed and multi-partner eco-system	» Skill gap in identity technologies
