Technology Tailored for Enterprises

SimpleVoIP's core service provides a robust and fully managed Unified Communications as a Service (UCaaS) platform tailored to the specific needs of distributed enterprises.

With exceptional customer support, our platform is customizable for a solution that precisely fits your requirements. It is an ideal replacement for traditional POTS or PBX systems and offers a manageable first step toward cloud adoption for large-scale distributed enterprise applications.

Essential

This plan includes all our essential features for unnamed users, such as paging, conference rooms, and public phones.

Shared

This plan includes extensions for retail and restaurant applications and includes all our essential features with 1 DID per location.

Enterprise

This plan provides essential features, DID, a personal conference bridge, eFax, and mobile and desktop apps. It also includes Microsoft Teams licensing.

Key Features

- Unlimited Capacity
- Unlimited Calling
- Portal with real-time status, analytics, reporting, and management tools
- Money back guaranteed

Available Upgrades:

- Mobile/Desktop License with SMS
- Teams License with SMS
- Personal Conference Bridge
- Call Recording
- CRM Integration
- Proactive Support

Integrated Partner Solutions

We offer these services and solutions in addition to our core Managed UCaaS service.

SD-WAN

Partnered with leading providers

Connectivity

Voice and data networks
Cloud-based POTS replacement

Network Aggregation

Invoice consolidation
One point of contact for support

Cost Optimization

CapEx to OpEx
Technology spend reduction

We understand your business needs.

We're laser-focused on the needs of distributed enterprises with features, functionality, and services to meet them

Communications made simple

We are a one-stop-shop for voice and data network solutions, offering tools and processes that simplify your communications.

We tailor solutions just for you.

We have a customer-first approach and employ a consultative sales process, ensuring the delivery of customized solutions that fit just right for your business.

We're more than just a UCaaS provider.

We deliver a holistic technology experience that extends beyond our robust unified communication platform.
