

Managed Cloud Services

Drive Efficiency, Scale, and Agility

The move to cloud can seem daunting to even the most experienced organizational leaders and IT professionals. With so many options across Private Cloud, Public Cloud, and Software as a Service (SaaS) platforms, the choices can be overwhelming. In most cases, the best solution is a combination of cloud platforms that can address diverse needs across the organization. As a multicloud service provider, Thrive delivers the cloud solutions that best fit your needs and budget.

ThriveCloud

ThriveCloud provides a fully managed private cloud solution for organizations who wish to outsource the infrastructure and management of their critical IT assets and seamlessly migrate from legacy datacenter and on-premises servers to the cloud. ThriveCloud delivers performance, reliability, availability, and resiliency and removes the expensive cycle of hardware expansion and replacement needed to meet critical application requirements.

Enterprise ThriveCloud offers Infrastructure as a Service (IaaS) for clients who desire a private cloud option but want to maintain day to day control and management of the environment. Enterprise ThriveCloud provides the underlying compute, network, and storage infrastructure while allowing your team to manage the cloud resources within your dedicated private cloud tenant.

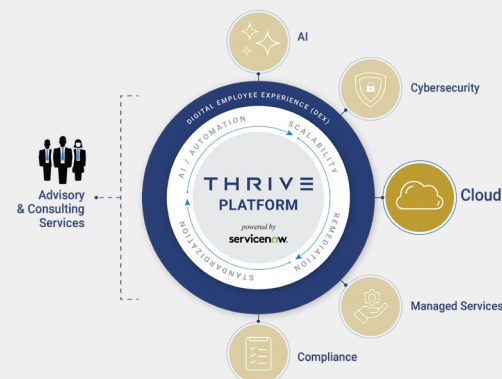

Managed Azure

Public cloud offers organizations flexibility in services, geography, and scale that private cloud may not be able to address. Thrive, as a Direct Tier-1 Microsoft Cloud Service Provider, provides Microsoft Azure subscriptions and delivers fully managed Azure services globally, enabling organizations to take advantage of all the capabilities that public cloud can offer.

Microsoft 365

Applications once supported by dedicated internal IT teams are now readily available "as a Service." The need to build and maintain legacy systems to support basic business functions like email are no longer required. Thrive as a Microsoft Cloud Service Provider offers subscriptions and management for all Microsoft 365 services, including Commercial, Education, Charity, and Government subscriptions. Our team of experts can seamlessly migrate your legacy desktop applications to take advantage of the flexibility Microsoft 365 solutions offer.

The Thrive Difference

Thrive's team of cloud experts have a proven record of delivering managed Cloud services across public and private cloud platforms with white-glove customer service. With decades of experience, Thrive has the knowledge and expertise to guide our clients on their path to the cloud by designing, building, and providing ongoing management for the cloud solutions that best fits your organizations needs and budget. In most cases, the result is a multicloud solution tailored to your requirements to maximize the power and scale available across multiple cloud platforms.

Thrive Cloud Services can be customized to seamlessly match your compliance, operational and budget requirements. Our portfolio of Cloud and professional services can make your journey to the cloud affordable while benefiting from the reliability and uptime that you should expect from Thrive.

Thrive Cloud Services enable you to:

- **Control Costs and Gain Value**
 - Eliminate the uncertainty and costly nature of infrastructure, hardware capital expenditures, and refresh cycles
 - Streamline operating budgets and avoid expensive and cumbersome maintenance and support renewal agreements
- **Gain More Flexibility**
 - Access your applications seamlessly and securely from anywhere
 - Easily add or remove resources as your business requirements change
 - Utilize multiple Cloud platforms to optimize performance and cost – all managed by Thrive's expert team of Cloud engineers
- **Improve Security and Resiliency**
 - Experience the highest levels of availability and performance with a fully redundant and resilient Cloud architecture
 - Secure your data with NextGen Firewalls, Endpoint Detection and Response, and Distributed Denial of Service (DDoS) detection and mitigation
