

# Thrive + HPE

---

Powering Intelligent IT Infrastructure  
with Edge-to-Cloud Innovation

# A Strategic Alliance for Modern IT Infrastructure

At Thrive, we are committed to helping organizations modernize IT for agility, performance, and scale. Our partnership with Hewlett Packard Enterprise (HPE) combines Thrive's managed services expertise with HPE's robust hybrid cloud, compute, storage, and networking solutions.

Together, Thrive and HPE help businesses reduce complexity, enhance performance, and accelerate digital transformation with future-ready infrastructure and services.

## What Is HPE?

Hewlett Packard Enterprise (HPE) is a global edge-to-cloud technology leader that helps organizations unlock value from their data everywhere it lives. HPE delivers open, intelligent infrastructure and services that enable:

- Hybrid cloud and cloud-as-a-service solutions, built on HPE GreenLake private cloud
- High performance compute and storage systems
- Network and security solutions

HPE empowers businesses to modernize IT environments with agility, security, and operational efficiency.

## How Thrive and HPE Work Together

Thrive and HPE partner across the entire technology lifecycle, from strategy to deployment and optimization:

- **Solution Advisory and Architecture**  
We assess business goals and IT requirements to recommend the right HPE infrastructure, including GreenLake cloud consumption models and hybrid or edge deployments.
- **Implementation and Integration**  
We deploy HPE solutions, configure systems, and integrate them with your operational environment to ensure seamless workflows and performance.
- **Managed Services and Operations**  
Thrive provides ongoing support, monitoring, and optimization so your HPE investment continues delivering value.
- **Optimization and Scalability**  
We help evolve your infrastructure to support growth, new VMware migrations, high-performance workloads, and advanced use cases.

## Elevated Cloud Experience

HPE GreenLake and Morpheus Enterprise bring an unparalleled experience to Thrive Cloud.

- Greater control over resources
- Improved cost management
- Scalable infrastructure for evolving business needs
- Unified platform to deploy, manage, and monitor public, private, and physical systems

## Benefits to Your Business

- **Faster Time to Value:** Accelerate deployments with Thrive expertise and HPE consumable infrastructure offerings.
- **Flexible Infrastructure Models:** Choose as-a-service consumption with HPE GreenLake or traditional on premise deployments.
- **Simplified Operations and Cost Control:** Reduce complexity and optimize spend with intelligent management tools and automated workflows.
- **Hybrid Cloud Innovation:** Enable consistent operations across on premise, edge, and public cloud environments with unified tools and governance.

## Powering Your IT with Thrive Cloud

Thrive Cloud is the foundation of our platform-as-a-service (PaaS) offering, a managed private cloud designed to deliver greater control, flexibility, and performance. Powered by Morpheus, it enables hybrid cloud management across public and private environments, including VMware, on-premises systems, and data centers, all through a single management platform. This unified approach helps organizations boost performance, manage cloud costs, and leverage predictive analytics while strengthening security through better visibility and centralized control. More than just a solution, Thrive Cloud serves as the backbone of our PaaS capabilities and can be delivered as fully managed, co-managed, or hosted based on each organization's needs.

## Who This is For

This partnership delivers value for organizations that:

- Are modernizing legacy infrastructure for hybrid cloud
- Need consumption-based IT flexibility and predictable costs
- Require scalable solutions for distributed or edge environments
- Want expert support for performance, reliability, and security

## Thrive + HPE: Enabling Future Ready IT

With Thrive as your partner and HPE as the technology foundation, your organization can modernize infrastructure, reduce risk, and drive measurable business outcomes. Thrive empowers you to unlock the full potential of HPE technologies from deployment to long term optimization.

## New Abilities to Tackle Complex Cloud Challenges

Thrive's enhanced cloud strategy allows us to help clients with more sophisticated and complex infrastructure needs. By leveraging HPE technologies, we unlock:

- Valuable solutions that improve ROI
- Support for advanced workloads and hybrid deployments
- Access to Thrive's portfolio of cybersecurity and AI services for clients who couldn't have their cloud needs met previously
