

# Managed Secure Access

## Industry-Leading Secure Access Products

Assuring secure access to corporate resources and applications, while also providing for smooth end user experience, is fundamental to a modern secure access strategy. Verifying user identity is paramount to that effort, but if the login process is onerous for the end user it can negatively affect their experience.

For many businesses creating a healthy balance between security and user experience can be very challenging. Thrive's Managed Secure Access can help. Single Sign-On (SSO) and Multi-Factor Authentication (MFA) are key components to a secure access regimen. SSO and MFA allow businesses to deploy remote secure access and access control products successfully. Thrive uses industry leading technology to provide Managed Secure Access with SSO and MFA as cornerstone components of their products.

Thrive's Managed Secure Access Service represents a comprehensive approach to leveraging those access technologies. Thrive Managed Secure Access Service adds ease of design and deployment to stand up or manage a company's secure access and then backs that with 24x7x365 Support. For businesses that are looking for a strong partner to alleviate the challenge of deploying and managing secure access around the clock for users Thrive's Managed Secure Access Service is a practical and affordable answer.

Thrive's Managed Secure Access is a comprehensive solution providing experienced support of secure access initiatives. The benefits of SSO and MFA include:

### Single Sign-On (SSO)

- Improved digital employee experience
- Saving time and raising productivity
- Safe SSO with more robust digital workplace security
- Reduce pressure on your IT helpdesk for the overall digital workplace
- Support for a single, integrated digital workplace

### Multi-Factor Authentication (MFA)

- Provides more layers of security than 2FA
- Assures consumer identity
- Meets regulatory compliances
- Complies with Single Sign-On (SSO) solutions
- Adds next-level security, even remotely
