This privately owned healthcare organization operates skilled nursing facilities in four states. Today, they have over 4,500 skilled nursing, personal care, and independent living units across 56 communities.

When they came to BCN this customer was managing multiple network providers, points of contact, and monthly invoices across their 56 skilled nursing communities. All time better spent focused on the health and wellbeing of those in their care.

BCN, along with their trusted technology adviser, guided the customer to satisfy their desire for simplified technology infrastructure, while laying the groundwork for future growth.

BCN's long history of success in healthcare meant they could quickly identify and eliminate obstacles the customer was facing, while delivering a roadmap for their technology infrastructure.

With this understanding and based on a wide range of contracted provider relationships, BCN was able to bring forth for the customer's consideration, the right mix of providers and services to consolidate existing services, contacts, and billing across their locations.

In addition, BCN delivered a thorough and complimentary audit of all existing services. This led to the identification of significant cost savings, even while upgrading many services to ensure a better experience for the customer across their communities.

The BCN solution included traditional and advanced technologies to address all the customer's needs - from traditional voice to diverse forms of internet connectivity.
