

Telecom Expense Management

brightfin takes the manual effort out of managing your voice & network services and gives organizations the savings and insights they need through global transparency into their telecom contracts, invoices, inventory, and vendors.

Reduce voice and network costs

Automatically detect billing errors, inconsistencies, and orphaned services with brightfin's automated auditing and reconciliation solutions.

Make your team more productive

Save your team time and effort by eliminating the manual work of processing invoices, allocating costs, and performing accruals with automations.

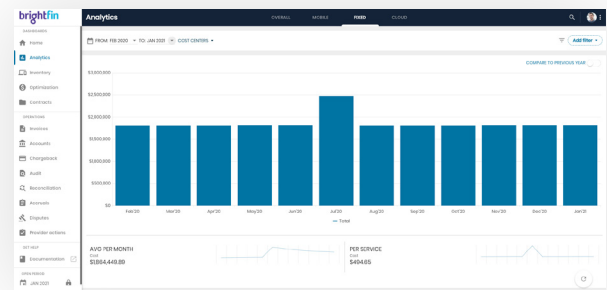

Get full telecom transparency

Get full visibility into your telecom-related expenses and services with detailed analytics and reporting down to individual service levels.

Centralize telecom management

Centralize voice and network assets, expenses, usage, and services across all vendors in a single platform with access for admins and cost-center managers.

The screenshot shows the brightfin Invoices dashboard. It displays a table of invoices with columns: PERIOD, EXPECTED START, PROVIDER, CONTRACT, DESCRIPTION, NUMBER, REPORT STAGE, and STATE. The table lists several invoices from providers like CenturyLink and Grandtel US LLC, with statuses ranging from 'Ready to Import' to 'Complete'.

The screenshot shows the brightfin Inventory dashboard. It displays a table titled 'Services by Provider' with columns: PROVIDER, SERVICE, QUANTITY, and COST. The table lists various services provided by different vendors, such as 'Voice' and 'Data' services from CenturyLink and Grandtel US LLC.
