

Cloud Expense Management

Many organizations find themselves using multiple providers for a significant number of services. With brightfin, IT groups can now drive cloud governance, find cost savings through optimization, and bring cloud expense management into existing IT management systems.

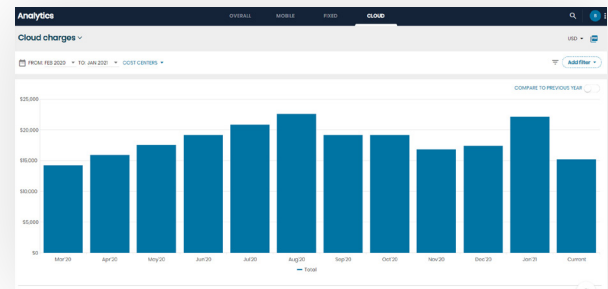

Actively reduce cloud costs

Gain control of your cloud costs by fully understanding cloud spend and by holding business units responsible for their expenses.

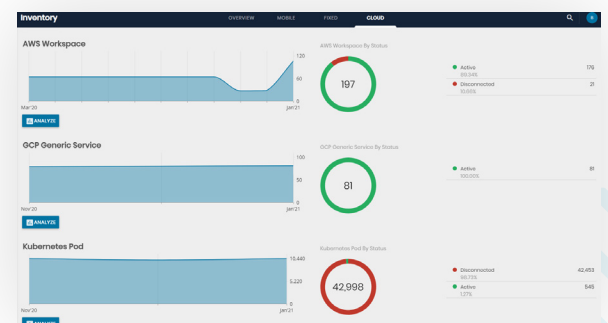

Make your team more productive

Eliminate the manual work of pouring over cloud bills, processing invoices, and allocating costs with automated processes in your ITSM, like ServiceNow.

Get full cloud transparency

Bring highly detailed cloud expenses, usage, and inventories into your ITSM and enjoy actionable analytics and reporting.

Enable cloud as a service

Manage multiple providers for multiple clients within a single portal in ServiceNow, or another ITSM, with domain separation.
